

OEI Services and Pricing

Current engagement paths, prerequisites, deliverables, and revenue-based pricing

Every engagement begins with a discovery call. Most comprehensive work starts with the Initial Diagnosis, which delivers standalone value and provides the baseline for deeper analysis. Prices below are baseline for companies under \$5M in annual revenue unless otherwise noted.

Core engagement paths

01 | Initial OEI Diagnosis

Initial OEI Diagnosis

Standalone | 4 days | Baseline investment: \$2,000

Structured interviews, workflow mapping, operational testing, and measurement produce an initial view of where operating speed is leaking.

- Baseline OEI score across five dimensions
- Executive summary and prioritized next steps

02A | 15-Day OEI Audit

15-Day OEI Audit

Requires Initial Diagnosis | 15 days | Baseline investment: \$8,000

A shorter deep-dive for simpler analyses, fewer monitored areas, or a more focused depth of inquiry.

- Focused root-cause findings
- Recommendations roadmap
- Quarterly check-in included

02B | 30-Day OEI Audit

30-Day OEI Audit

Requires Initial Diagnosis | 30 days | Baseline investment: \$15,000

A comprehensive audit for broader monitoring, deeper analysis, and a fuller operational map.

- Detailed root-cause mapping and documentation review
- Benchmarking context and prioritized roadmap
- Quarterly check-in included

03 | 30-Day Single Pain Point Sprint

30-Day Single Pain Point Sprint

Requires Diagnosis + Audit | 30 days | Baseline investment: \$25,000

A focused structural intervention for one clearly defined, high-impact bottleneck.

- Implementation support and change management
- Training where necessary
- 30-day post-launch monitoring
- Quarterly check-ins for six months

04 | 90-Day Operational Entropy Reset

90-Day Operational Entropy Reset

Requires Diagnosis + Audit | 90 days | Baseline investment: \$45,000

Structural fixes for the top three interconnected bottlenecks identified through the audit.

- Process redesign and full implementation
- Leadership and team coaching where necessary
- Systems and tool optimization
- 90-day post-launch support and quarterly check-ins

05 | One-Year OEI Trend Analysis

One-Year OEI Trend Analysis

Standalone; completed or active engagement recommended | 4 quarterly sessions | Baseline investment: \$5,000 per year

Quarterly measurement that tracks how entropy shifts, verifies whether fixes hold, and identifies new patterns early.

- OEI score remeasurement
- Updated recommendations each quarter
- Year-round support

Revenue-based pricing

Core consulting fees scale with verified annual revenue. Companies at \$100M+ receive custom pricing scoped to the organization.

Engagement	Under \$5M	\$5M-\$25M	\$25M-\$50M	\$50M-\$100M	\$100M+
Diagnosis	\$2,000	\$2,500	\$3,000	\$3,500	Custom
15-Day Audit	\$8,000	\$10,000	\$12,000	\$14,000	Custom
30-Day Audit	\$15,000	\$18,750	\$22,500	\$26,250	Custom
30-Day Sprint	\$25,000	\$31,250	\$37,500	\$43,750	Custom
90-Day Reset	\$45,000	\$56,250	\$67,500	\$78,750	Custom
One-Year Trend	\$5,000	\$6,250	\$7,500	\$8,750	Custom

Focused Operational Investigations

When the operating problem is already visible, a focused investigation may be used without completing the comprehensive OEI pathway. Typical investment: \$1,000-\$4,000 USD.

- **Founder Absence Simulation:** Tests what fails, stalls, or escalates when the founder steps away.
- **Institutional Memory Recovery Sprint:** Recovers essential knowledge trapped in people or history.
- **Workflow Momentum Analysis:** Locates waiting, friction, and loss of execution momentum.
- **Operational Stack Review:** Evaluates the fit and interaction of tools, systems, and workarounds.
- **Handoff Failure Analysis:** Traces where ownership, readiness, or context breaks during transfer.

Entropy Compatible Hiring software

ECH Version 0.1.0 BETA is a separate Windows desktop product with ten role-agnostic interview instruments. It can be used with OEI findings or independently and does not replace role-specific hiring evaluation.

One-time Beta pricing: \$950-\$1,450 USD. ECH pricing is not scaled by company revenue.

Pathway and payment notes

- The Initial Diagnosis is standalone; audits require the diagnosis.
- The 30-Day Sprint and 90-Day Reset require both diagnosis and audit.
- One-Year Trend Analysis is standalone, but is most useful with a completed or active engagement.
- Focused investigations and ECH may be accessed independently.
- Diagnosis and One-Year Trend Analysis are paid upfront. Longer consulting engagements are paid 50% upfront and 50% at the midpoint.
- Travel, custom tool development, permanent staff augmentation, and implementation beyond the engagement window are outside standard pricing.
