OEI Services and Pricing

Current capability pathways, public pricing, and optional interventions

OEI application uses two complementary roles. Researchers make operational reality legible through evidence. Practitioners assess what the evidence supports, make diagnostic judgments, and lead recommendations and delivery.

Practitioner development pathways

Pathway	People and roles trained	Total	60% upfront	40% after passing	Annual renewal
Company-Sponsored	Two people: one Practitioner and one Researcher	$10,000	$6,000	$4,000 Practitioner authorization	$500 per employed Practitioner
Independent Consultant	One person trained for both roles	$12,000	$7,200	$4,800	$600
OEI Native	Practitioner. Researchers may be assigned separately	$15,000	$9,000	$6,000	$750

The 60% training and assessment payment is non-refundable. Passing earns the candidate role certification and authorization. The remaining 40% is due only after passing. For Company-Sponsored, the $4,000 balance covers Practitioner authorization and is due if the Practitioner passes, even if the Researcher does not. One retake is available for the full 60% fee. Each candidate may attempt assessment twice total.

The first renewal year is waived after certification. Company-Sponsored renewal applies per internally employed Practitioner. Researchers have no renewal fee. Renewal changes immediately to the new pathway rate after an upgrade. Independent Consultant fees for full OEI engagements are capped at 50% of the corresponding OEI Native engagement fee, or $10,000-$22,500+ based on current Native pricing. This cap does not apply to Focused Investigations. An additional Researcher training and assessment process is $3,000. While an existing Company-Sponsored Researcher remains with the company, the company may fund Practitioner training and assessment for $2,500, followed by $2,000 for Practitioner authorization after passing. A former Company-Sponsored Practitioner may upgrade to Independent for $2,000 or OEI Native for $7,500, subject to applicable requirements. Full pathway and upgrade terms: operationalentropy.com/practitioner-development/.

OEI Native engagements

OEI Native Practitioners deliver engagements on behalf of the Institute. Current public range: $20,000-$45,000+ USD. Scope varies with organizational size, complexity, and the operational territory investigated and addressed.

Focused Investigations

A bounded entry point to investigate a specific operational domain through evidence-first OEI inquiry. Each investigation is scoped to the question and the work required; they are not identical, fixed-scope packages. Each includes a 4-Day OEI Diagnosis. Current public range: $1,000-$4,000 USD.

- **Founder Absence Simulation:** Tests what fails, stalls, or escalates when the founder steps away.
- **Institutional Memory Recovery Sprint:** Recovers essential knowledge trapped in people or history.
- **Workflow Momentum Analysis:** Locates waiting, friction, and loss of execution momentum.
- **Operational Stack Review:** Evaluates the fit and interaction of tools, systems, and workarounds.
- **Handoff Failure Analysis:** Traces where ownership, readiness, or context breaks during transfer.

Entropy Compatible Hiring

ECH Version 0.1.3 BETA is separate Windows desktop software with ten role-agnostic interview instruments and an Existing Employee Contribution Mapping module. It can be used independently; a formal OEI engagement is not required. One-time purchase range: $950-$1,450 USD.
